

DIESEL EXHAUST FLUID FILTERS

KEEP YOUR SCR SYSTEM FREE OF HARMFUL PARTICULATES

Newer diesel engines are equipped with Selective Catalytic Reduction (SCR) systems to reduce harmful nitrogen oxide (NOx) emissions. These SCR systems require Diesel Exhaust Fluid (DEF) to keep the SCR system operating as intended.

The storage and transportation of DEF can lead to contamination, that if not removed, can reduce emissions system performance or potentially damage the SCR system resulting in costly repairs.

A DEF system utilizes a Diesel Exhaust Fluid filter to keep the SCR system free of contaminants. Trust Baldwin DEF filters to remove contaminants, keep your SCR system working properly, and reduce harmful NOx
