

PRODUCT UPDATE

Dahl Rationalisation Project

Parker's Engine and Mobile Filtration Division EMEA (EMFE) would like to update you with important changes with regards to the Dahl product range.

Dahl Housings:

- These will be made obsolete as any remaining stock is consumed and then superseded by Racor branded housings.
- Dahl 65, 75, will be crossed to the Racor 200 series equivalent
- Dahl 100, 150, 200 and 300 series will be crossed to the Racor Turbine series equivalent.
- Dahl 300-DHRA and Dahl 500 do not have a Racor alternative and will be made obsolete.
- Complete cross reference listing is over the page.

Dahl Elements:

- No change to part numbers, they will remain the same and continue to be saleable.

Dahl Accessories:

- We will continue to supply for current Dahl housings for the next 2yrs.

This is a running change, the implementation will be transitional starting from March 2020 aiming to be complete by June 2020.

Contact Information:

Parker Hannifin Corporation
Engine & Mobile Filtration Division EMEA

Email: emfeaftermarket@parker.com

Reference: FDBN266UK 02/2020

This change is applicable to all Dahl parts that are ordered via the Schoten, Belgium location in EMEA.

If you require any information on this product update do not hesitate to contact the Commercial and Technical Support Team in the Independent Aftermarket Business Unit.

PRODUCT UPDATE

Dahl Rationalisation Project

Please find a listing of the Dahl part numbers that will be affected by this rationalisation.

Dahl Part #	Racor Standard Cross
65	230R10
