

Fine Dust Filters

Used to separate: PM1, PM2.5, soot, cement dust, spores and larger bacteria.

Fine dust filters serve either as final filters for HVAC and similar applications, or as prefilters for EPA, HEPA or ULPA filters in ultra-clean environments.

Fine dust filters typically feature either a mini-pleated media in a variety of frame styles, or are formed into pockets in a bag filter.

Packing more into each millimeter. Airpocket Eco's wave media provides a greater filter area and allows dirt to be depth loaded within the media.
