Disclaimer

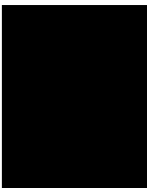

This catalog is provided for convenience and is intended to be accurate. The manufacturer makes no guarantee, expressed or implied, to the accuracy of the catalog content.

Original Equipment Manufacturers (OEMs) offer engine and/or filter options on specific models; OEM's make changes during a production year; owners may modify equipment. Therefore, all models may not use the specific filter indicated in this catalog.

Refer to the OEM filter part number cross-reference for the most accurate information. Cummins Filtration is not responsible for misapplications. Some products are not available in all regions of the world.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

				51364	LF3310 WIX				

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to "Superfilter" specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KQV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 3. Refer to Principal Application section to determine performance level. 4. Refer to Principal Application section for Synthetic Media version. 5. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 6. Propylene Glycol Formulation. 7. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 8. Does not meet OE specifications. 9. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Supersitter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Supersifter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Prop

2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

Locomotive Applications

BROOKVILLE EQUIPMENT

BL36PH PASSENGER (railway equipment)
 Engine: MTU 20V4000
 Fuel, Spin-On FF5633^{OR}
 Fuel/Water FS1292
 Separator,
 Spin-On
 Lube LF3781*

HARSCO CORPORATION

925 TIE EXCHANGER (railway equipment)
 Engine: CUMMINS 4B3.9
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461^{OR}
 Fuel, In-Line FF5079
 Fuel/Water FS1280
 Separator,
 Spin-On
 Lube, Full-Flow LF3349*
 Spin-On
 Hydraulic, Spin-On HF6553*^{OR}
 Hydraulic, Spin-On HF6532^{OR}
 Hydraulic HF35381*

925SS TIE INSERTER REMOVER (railway equipment)
 Engine: CUMMINS 4B3.9
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461
 Fuel/Water FS1251^{OR}
 Separator,
 Spin-On
 Fuel/Water FS1280
 Separator,
 Spin-On
 Lube, Full-Flow LF3345*
 Spin-On

950 TIE CRANE (railway equipment)
 Engine: CUMMINS 4B3.9
 See: 925 TIE EXCHANGER

MARK IV (railway equipment)
 Engine: CUMMINS 6CTAA8.3
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461
 Fuel/Water FS1280
 Separator,
 Spin-On
 Lube, LF9009
 Combination
 Hydraulic, Spin-On HF6555
 Water, Spin-On WF2076

MARK VI (railway equipment)
 Engine: CUMMINS 6CTAA8.3
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461^{OR}
 Fuel, In-Line FF5079
 Fuel/Water FS1280^{OR}
 Separator,
 Spin-On
 Fuel/Water FS1251
 Separator,
 Spin-On
 Lube, LF3000*
 Combination

MODEL 2400 UTILITY TAMPER (railway equipment)
 Engine: CUMMINS 4BT3.9
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461
 Fuel/Water FS1280^{OR}
 Separator,
 Spin-On
 Fuel/Water FS1251
 Separator,
 Spin-On
 Lube, Full-Flow LF3345*
 Spin-On

MODEL 3000 UTILITY TAMPER (railway equipment)
 Engine: CUMMINS 6BTA5.9
 Fuel, User FF42000^{OR}
 Friendly
 Version
 Fuel FF5461
 Fuel/Water FS1280^{OR}
 Separator,
 Spin-On
 Fuel/Water FS1251
 Separator,
 Spin-On
 Lube, Full-Flow LF3349*
 Spin-On

MODEL 3300S TAMPER (railway equipment)
 Engine: CUMMINS QSB6.7
 Fuel FF5612^{OR}
 Fuel FF5632*
 Fuel/Water FS20022^{OR}
 Separator,
 Spin-On

Fuel/Water Separator, Cartridge	FS19830
Hydraulic, Cartridge	HF28811 ^{OR}
Hydraulic, Cartridge	HF30747 ^{OR}
Hydraulic, Spin-On	HF28919

BAAM BULK AUTO ANCHOR MACH (railway equipment)
Engine: JDEERE 4045T

Fuel, In-Line	FF5705
Fuel/Water Separator, Cartridge	FS19829 ^{OR}
Fuel/Water Separator, Cartridge	FS19830
Lube, Spin-On	LF16243
Hydraulic, Cartridge	HF28811 ^{OR}
Hydraulic, Cartridge	HF30747 ^{OR}
Hydraulic, Spin-On	HF28919 ^{OR}
Hydraulic, Cartridge	HF28813 ^{OR}
Hydraulic, Spin-On	HF7952
Hydraulic	ST1337

CX HAMMER PRODUCTION SPIKER
(railway equipment)
Engine: JDEERE 4045T

Fuel/Water	FS19573OR
Separator	
Fuel/Water	FS19838
Separator, Cartridge	
Lube, Spin-On	LF3703

M7 BALLAST REG SNOW FIGHTER
(railway equipment)
Engine: CUMMINS QSC8.3-300

Fuel, User	FF42000
Friendly	
Version	
Fuel/Water	FS1280
Separator, Spin-On	
Lube,	LF9009
Combination	
Water, Spin-On	WF2074

M7 BALLAST REG SNOW FIGHTER
(railway equipment)
Engine: JDEERE 6068H

Fuel/Water	FS19517OR
Separator	
Fuel/Water	FS19861
Separator, Spin-On	
Lube, Full-Flow	LF678OR
Spin-On	
Lube, Spin-On	LF3567
Hydraulic, Spin-On	HF6557OR
Hydraulic, Spin-On	HF35305

RIDE ON ADZER (railway equipment)
Engine: DEUTZ F4L2011

Fuel, In-Line	FF149OR
Fuel, User	FF42002OR
Friendly	
Version	
Fuel, Spin-On	FF5113OR
Fuel, Cartridge	FF135
Lube, Spin-On	LF3766

TRIPP TIE EXCHANGER (railway equipment)
Engine: JDEERE 6068H

Fuel/Water	FS19517OR
Separator	
Fuel/Water	FS19861
Separator, Spin-On	
Lube, Full-Flow	LF678OR
Spin-On	
Lube, Spin-On	LF3567
Hydraulic, Spin-On	HF6557OR
Hydraulic, Spin-On	HF35305

NORDCO - OSHAWA
QUAD DRILL (railway equipment)
Engine: JDEERE 4045T

Fuel, In-Line	FF5705
Fuel/Water	FS19829OR
Separator, Cartridge	
Fuel/Water	FS19830
Separator, Cartridge	
Lube, Spin-On	LF16243
