# Baldwin - Spin-on Coolant Filters with BTE Formula

Part #: BW5139

The objective of diesel engine coolant filters, also known as water filters, is to remove contaminants from the engine cooling system and add chemicals to the coolant itself to replenish important protectants that may be lost over time.

## Technical Specifications

|                                |  |                 |   |
|--------------------------------|--|-----------------|---|
| Brand:                         | Baldwin  | Length:         | 5 11/32 (135.7)   |
| Product Type:                  | Coolant Spin-on with BTE Formula   | Gasket:         | Integral Gasket: G381-A   |
| Notes:                         | Maintenance filter for systems with 31-40 gallons capacity.; Can be used with CFB5000 base or CFB8784 dual base. | Micron Rating:  | 20 Nominal; 45 Absolute   |
| Contains:                      | 8 Units BTE  | Application:    | Caterpillar, Komatsu Equipment  |
| Thread Size:                   | 11/16-16   | Compatible      | Allis Chalmers 4393504, 4393504-8; Case A152819;                                    |
| Outside Diameter:              | 3 11/16 (93.7)   | Competitor Part | Caterpillar 9N3366; Cummins 209607; GMC 6439698;                                    |
|                                |  | Number:         | Hino 16304-1011; International 1801089-C1; John Deere AR88276; Komatsu 600-411-1040 |

## Item Information

"The objectives of diesel engine coolant filters, also known as water filters, are to remove contaminants from the engine cooling system and add chemicals to the coolant itself to replenish important protectants that may be lost over time. Baldwin Filters' coolant spin-on filters with Balanced Treatment for Ethylene Glycol (BTE) formula are designed to protect the engine and enhance its performance. BTE formula coolants offer a combination of low-silicate antifreeze and water, which removes heat and lubricates the water pump. They provide freeze protection and prevent scale-sludge formation.
