Technical Specifications

Core Type:	Polypropylene	Outside Diameter:	2.75 inch
Filter Construction:	Pleated Membrane	Hose Reinforcement Material & Structure:	Polypropylene
Brand:	Parker	Seal Material:	Buna-N
Flow Rate:	2.6GPM/PSID per 10 inch cartridge equivalent for 0.2	Secondary Seal:	N/A
End Cap Material:	Polypropylene	Micron Rating (µm):	0.2
Media:	PES (Polyethersulfone)	End Cap Configuration:	226 O-Ring/Fin
Function:	Clarification/Prefiltration/Polishing	Length (inch):	30
Industry:	Food and Beverage	Style:	No Insert

[Safety Warning](#)

Item Information

The Clariflow-WG Pleated Membrane Filter Cartridge is built around a unique polyethersulfone (PES) membrane that is inherently hydrophilic, and contains no added surfactants or wetting agents. It delivers clean filtrates, flow rates, extended service life and excellent resistance to hydrolysis. Water Service cartridges are fabricated under cleanroom conditions.
