# **Wedium Pressure Inline Filters CN Series**

Solutions

Part #: 80CN210QEVM3KG244 Where to Buy

The CN Series is a compact, cost effective, medium pressure filter designed with coreless filtration technology. CN Series bowl features a permanently fixed core designed to reduce solid waste and minimize disposal costs with every element change out.

## **Technical Specifications**

Flow Rate:
Filter Element Type:
Seal Material:
Port Connection Type:
Specifications Met:

440 l/min (116 gal/min) 10QE Ecoglass Fluorocarbon G1½" n/a

Bypass Valve Pressure Rating: Options: Micron Rating: Indicator Type: Indicator Pressure Setting: 3.5 bar (50 psi) Drain port 10 µm

Visual Automatic Reset 2.5 bar

Item Information

▲ Safety Warning

Compressor Lube Oil
Off-line Filter Loops
Machine Tools (Automotive Standard)
Hydrostatic Drive Charge Pumps
Mobile Equipment
Pilot Lines for Servo Controls
Oil Patch Drilling Equipment
Injection Molding

This partial list of applications for Parker CN series filters has a common factor, the need for an economical, medium pressure range filter with excellent fatigue pressure ratings. Prior to the availability of the CN filter, applications such as those listed were restricted by limitations of a spinon can, or forced into the higher cost range of high pressure filters.

The CN series fills this gap, and now with the newly increased fatigue rating from 550 to 800 psi, the applications are expanded.

#### Features

- · 800 psi fatigue rating (eight times that of a spin-on)
- · Diametral (side) seal between head and bowl
- · Dust Seal

Advantages

Products
to provide reliable service under tough cyclic operating conditions
to provide reliable service under tough cyclic operating conditions

Can be utilized in applications where high pressure filters may have been only option

Support reliability in cyclic applications

· Reduced importance of bowl torque

Industries contamination from building up on bowl / head threads

· Low profile, lightweight and durable

Services and efficiency

· Reduces pleat bunching, keeps performance consistent

Solutions nent information is provided in an easy-to-compare format

Check element condition at a glance

WRighttotyBevior the application

#### **Benefits**

- · Reduced downtime due to premature filter failures
- · Reduced costs, better "fit" for the application
- · No downtime, no leaks
- · Performs with "real world" service
- · Easier service, no galling
- · Less weight, smaller envelop and cleaner appearance
- · Great performance value
- · Reliable performance throughout element life
- · Reduces downtime, maximizes element life
- · No hidden deficiencies
- · Easy selection of proper filtration
- · Optimize element life, prevent bypassing
- · Matches your system electrical connections
