Element Type:	Spin-On	Length:	Single
Filter Element:	10B Microglass	Seal Material:	Nitrile

[Safety Warning](#)

Item Information

Using Parker 12AT/50AT/80AT/80UT Series replacement spin-on cans guarantees Parker's quality of filtration. Using aftermarket filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs, more waste, and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

Available in single and double lengths with several micron ratings (3,10, 20, 25) and media options (Microglass & Cellulose), these replacement spin-on cans ensure the quality of filtration Parker is known for. For ordering, please refer to the "How to Order" section of the literature or contact a Parker Representative.
