## Technical Specifications

Seal Material:	fluorocarbon	Product Style:	Hydraulic Filter
Filter Element:	WR Water Removal	Product Type:	Hydraulic Filter Element
Filter Housing Series:	IL81	For Fluid Type:	Mineral, Petroleum and Polyalphaolefin (PAO) based fluids
Length:	single	Filter Element Type:	Coreless

[Safety Warning](#)

## Item Information

The Parker IL8 Series is a medium pressure filter designed with Microglass filtration technology. IL8 Series replacement elements feature coreless construction. The design reduces solid waste and minimizes disposal costs for industry.

Using Parker IL8 Series replacement elements guarantees Parker's quality of filtration, directly impacting the fluid cleanliness levels. Using aftermarket filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

Available in Double and Triple lengths and several micron ratings (2, 5, 10, and 20), these replacement elements ensure the quality of filtration Parker is known for. For ordering, please refer to the "How to Order" section of the literature or contact a Parker Representative.
