## Item Information

The 15/40/80CN Series is a range of medium pressure filters offering an economical 'multipurpose' filter solution.

ffered with two types of element:

- The conventional element, making use of the Microglass media and in some sizes also available with ParGelWater removal media.

**Parker Sales Company UK**

- The Ecoglass element, an environmentally friendly design without metal inner core. The Eco elements are used in versions of the CN filter with an [www.parker.com](http://www.parker.com) [customer.support@parker.com](mailto:customer.support@parker.com) [+44 \(0\)1926 317878](tel:+441926317878) the bowl of the filter. Having no metal content in the element reduces the overall weight with 50% and makes it possible to dispose of the used element in an environmentally friendly way by incineration, also lowering disposal costs.

These elements are designed with the latest in filter media technology for first class system protection.

**+ Company Information**

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
