Item Information

The Parker 15P-30P-30P Series is a high pressure filter designed with the latest filtration technology.

Using the Parker 15P-30P-30P Series replacement elements guarantees Parker's quality of filtration, directly impacting the fluid cleanliness levels. Using aftermarket filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

Available in Single and Double lengths and are available with optional levels of high collapse (2000 psid and 3000 psid) several micron ratings (2, 5, 10, and 20), these replacement elements ensure the quality of filtration Parker is known for. For ordering, please refer to the "How to Order" section of the literature or contact a Parker Representative.
