### Technical Specifications

For Use With:	80CN		• Compressor Lube Oil
Division:	Hydraulic and Industrial Process Filtration EMEA	Application:	• Off-line Filter Loops
Length:	Length 1		• Machine Tools (Automotive Standard)
Brand:	Parker		• Hydrostatic Drive Charge Pumps
Technology:	Filtration		• Mobile Equipment
Filter Element Type:	10Q Microglass	For Fluid Type:	• Pilot Lines for Servo Controls
Product Type:	Hydraulic Oil Filter		• Oil Patch Drilling Equipment
Seal Material:	Nitrile	Flow Rate:	• Injection Molding
Micron Rating:	10 µm		Suitable for use with mineral and vegetable oils, and some synthetic oils.
Filter Type:	Medium Pressure Inline Filter	Operating Pressure:	Maximum:
Product Series:	Replacement Elements - CN Series		0 to 600 L/min
	• Industrial Manufacturing Equipment		70 bar (1015 psi)
	- Automotive	Operating Temperature:	Seal material Nitrile:
	- Food & Beverage		-40°C to +100°C
	- Rubber & Plastics		(-40°F to +212°F)
	- Metals		Seal material Fluoroelastomer:
	• Off-road Machinery		-20°C to +120°C
	- Agriculture		(-4°F to +248°F) -40 to +100°C
	- Construction		
	- Forestry		
	- Lawn & Turf		
Industry:	- Mining		
	- Materials Handling		
	• Government		
	- Military		
	- Defence		
	• Power Generation & Renewable Energy		
	• Transportation		
	- Rail		
	- Trucks & Buses		

 Safety Warning

## Item Information

The 15/40/80CN Series is a range of medium pressure filters offering an economical 'multipurpose' filter solution.

Offered with two types of element:

- The conventional element, making use of the Microglass media and in some sizes also available with ParGelWater removal media.

### Parker Sales Company UK

- The Ecoglass element, an environmentally friendly design without metal inner core. The Eco elements are used in versions of the CN filter with an inner bowl of the filter. Having no metal content in the element reduces the overall weight with 50% and makes it possible to dispose of the used element in an environmentally friendly way by incineration, also lowering disposal costs.

These elements are designed with the latest in filter media technology for first class system protection.

### + Company Information

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

### + Help & Support
