Technical Specifications

For Use With:	80CN		
Division:	Hydraulic and Industrial Process Filtration EMEA	Application:	<ul style="list-style-type: none"> Compressor Lube Oil Off-line Filter Loops Machine Tools (Automotive Standard) Hydrostatic Drive Charge Pumps Mobile Equipment Pilot Lines for Servo Controls Oil Patch Drilling Equipment Injection Molding
Length:	Length 2	For Fluid Type:	Suitable for use with mineral and vegetable oils, and some synthetic oils.
Brand:	Parker	Flow Rate:	0 to 600 L/min
Technology:	Filtration	Operating Pressure:	Maximum: 70 bar (1015 psi)
Filter Element Type:	10Q Microglass	Operating Temperature:	Seal material Nitrile: -40°C to +100°C (-40°F to +212°F)
Seal Material:	Nitrile		Seal material Fluoroelastomer: -20°C to +120°C (-4°F to +248°F)-40 to +100°C
Product Type:	Hydraulic Oil Filter		
Micron Rating:	10 µm		
Filter Type:	Medium Pressure Inline Filter		
Product Series:	Replacement Elements - CN Series <ul style="list-style-type: none"> Industrial Manufacturing Equipment Automotive Food & Beverage Rubber & Plastics Metals 		
Industry:	<ul style="list-style-type: none"> Off-road Machinery Agriculture Construction Forestry Lawn & Turf Mining Materials Handling 		
	<ul style="list-style-type: none"> Government Military Defence 		
	<ul style="list-style-type: none"> Power Generation & Renewable Energy 		
	<ul style="list-style-type: none"> Transportation Rail Trucks & Buses 		

 **Safety Warning**

Item Information

The 15/10/00CN Series is a range of medium pressure filters offering an economical 'multipurpose' filter solution.

CN series filters can be offered with two types of element:

Home

- The conventional element, making use of the Microglass media and in some sizes also available with ParGelWater removal media.

Products

- The Ecoglass element, an environmentally friendly design without metal inner core. The Eco elements are used in versions of the CN filter with an Eco inner core fixed permanently inside the bowl of the filter. Having no metal content in the element reduces the overall weight with 50% and makes it possible to dispose of the used element in an environmentally friendly way by incineration, also lowering disposal costs.

Support

Industries

These elements are designed with the latest in filter media technology for first class system protection.

Services

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your

Solutions

Investment by always buying genuine Parker replacement elements.

Where to Buy

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
