### Technical Specifications

For Use With: 80CN  
 Division: Hydraulic and Industrial Process Filtration EMEA  
 Brand: Parker  
 Length: Length 2  
 Technology: Filtration  
 Filter Element Type: 10Q Microglass  
 Product Type: Hydraulic Oil Filter  
 Seal Material: Fluoroelastomer  
 Micron Rating: 10 µm  
 Filter Type: Medium Pressure Inline Filter  
 Product Series: Replacement Elements - CN Series

- Industrial Manufacturing Equipment
- Automotive
- Food & Beverage
- Rubber & Plastics
- Metals

Industry:

- Off-road Machinery
- Agriculture
- Construction
- Forestry
- Lawn & Turf
- Mining
- Materials Handling

- Government
- Military
- Defence

- Power Generation & Renewable Energy

- Transportation
- Rail
- Trucks & Buses

Application:  
 For Fluid Type:  
 Flow Rate:  
 Operating Pressure:  
 Operating Temperature:

- Compressor Lube Oil
- Off-line Filter Loops
- Machine Tools (Automotive Standard)
- Hydrostatic Drive Charge Pumps
- Mobile Equipment
- Pilot Lines for Servo Controls
- Oil Patch Drilling Equipment
- Injection Molding

Suitable for use with mineral and vegetable oils, and some synthetic oils.

0 to 600 L/min

Maximum:  
70 bar (1015 psi)

Seal material Nitrile:  
-40°C to +100°C  
(-40°F to +212°F)

Seal material Fluoroelastomer:  
-20°C to +120°C  
(-4°F to +248°F)-40 to +100°C

## Item Information

The 15/40/80CN Series is a range of medium pressure filters offering an economical 'multipurpose' filter solution.

ffered with two types of element:

- The conventional element, making use of the Microglass media and in some sizes also available with ParGelWater removal media.

### Parker Sales Company UK

- The Ecoglass element, an environmentally friendly design without metal inner core. The Eco elements are used in versions of the CN filter with an [www.ecoglass.com](http://www.ecoglass.com) support. The bowl of the filter. Having no metal content in the element reduces the overall weight with 50% and makes it possible to dispose of the used element in an environmentally friendly way by incineration, also lowering disposal costs.

These elements are designed with the latest in filter media technology for first class system protection.

### + Company Information

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
