Technical Specifications

Maximum Pressure Differential:	8 bar (ISO 2941)	Micron Rating:	10 µm
Filter Housing Series:	ETF1 (1-45) / FK1220	Length:	82 mm
Filter Element Type:	Disposable element	Diameter:	71 mm
Filter Element:	10Q Microglass		

[Safety Warning](#)

Item Information

Utilizing a re-inforced co-polymer head the ETF Series offers a range of economic return line filters that are used and have been proven in many hydraulic filtration applications.

The ETF Series elements have an In to Out flow design that avoids re-contamination of the hydraulic system. Available with Microglass media in 2, 5, 10 and 20 microns the ETF elements provide premium particle removal efficiency.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
