SREPlacement Elements - High Pressure In-Line Filter 70/70 Eco Series

Solutions

Part #: 938782Q Where to Buy

(

High pressure inline hydraulic oil filter series is a proven filter concept, up to 500l/min and pressures up to 420 bar.

Technical Specifications

Division: Hydraulic and Industrial Process Filtration EMEA

For Use With: 70 series length 3

Brand: Parker
Filter Element Type: 20Q Microglass

Technology: Filtration
Micron Rating: 20 µm

Product Type: Hydraulic Oil Filter Replacement Elements

Seal Material: Nitrile

Product Series: 70/70 Eco Series
Length: 328 mm
End Cap Material: Plastic

Mining

Material handling Construction

Marine Power Generation

Industrial Machinery Injection Moulding

Application:

Options:

Deck machinery Wind turbines Hydropower Servo controls

For Fluid Type: Suitable for use with mineral and vegetable oils, and

operating Pressure: some synthetic oils.

420 bar (350 bar Length 4) Maximum.

Operating 1 16336

Temperature:

-40°C to +100°C.

Drilling machines

Mobile cranes

Reach stackers

Crushing machines Propulsion systems

Hydraulic power units

Container handling equipment

Dumpers

Cranes

Excavators

⚠ Safety Warning

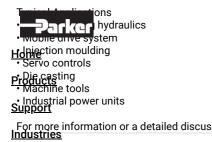

Industry:

Item Information

The 70/70 Eco Series of high pressure filters are designed to satisfy demanding applications in the mobile and industrial markets. With multiple mounting options, this high pressure filter series is right filter for many applications. The 70/70 Eco Series filter series has a wide range of high capacity and low initial differential pressure elements, including a no metal content Eco element, offering excellent protection to system components.

The 70/70 Eco Serie offers several bowl lengths to secure the lowest possible pressure drop for each application. For critical applications such as servo or proportional controls, a no bypass high strength element combination ensures maximum protection.

The low hystereis differential pressure indicator fitted to this series is unrivalled in its performance.
