### Technical Specifications

Product Series:	DF65	Filter Element Type:	Disposable element for re-usable innercore
Seal Material:	Fluoroelastomer	Filter Element:	02Q1 Microglass
Maximum Pressure Differential:	8 bar on re-usable innercore (ISO 2941)		

[Safety Warning](#)

### Item Information

Items marked with an asterisk \* in the drop-down menus are standard choices.

The high quality replacement elements of the DF65 duplex filter series are available with glassfibre and metal mesh filter materials and several micron ratings.

Due to the patented construction of the DF65 elements, the quality of filtration is guaranteed, as no 'pirate spare parts' can be used. This ensures the element remains the truly protective 'DNA' of hydraulic & lubrication systems.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
