Product Series:	DF40	Filter Element Type:	Conventional disposable element
Seal Material:	Fluoroelastomer	Filter Element:	02Q Microglass
Maximum Pressure Differential:	20 bar (ISO 2941)		

[Safety Warning](#)

Item Information

The high quality replacement elements of the DF40 filter series are available in a wide variety of sizes and with several filter materials and micron ratings.

These replacement elements ensure the quality of filtration Parker is known for.

Eco elements are available for the DF40 filter to help save the environment and reduce the customer's disposal costs, as no metal parts are included.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
