Seal Material:	Fluoroelastomer	Filter Element:	10Q Microglass *
Maximum Pressure Differential:	5 bar on re-usable innercore (ISO 2941)		

[Safety Warning](#)

Item Information

Items marked with an asterisk * in the drop-down menus are standard choices.

The high quality replacement elements of the DF60 duplex filter series are available with glassfibre and metal mesh filter materials and several micron ratings.

These replacement elements ensure the quality of filtration Parker is known for.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
