Technical Specifications

Product Series:	DF2070	Filter Element Type:	Conventional disposable primary element
Seal Material:	Element has no seal	Filter Element:	10Q Microglass *
Maximum Pressure Differential:	5 bar (ISO 2941)		

[Safety Warning](#)

Item Information

Items marked with an asterisk * in the drop-down menus are standard choices.

The high quality replacement elements of the DF2070 filter series are available with several filter materials and micron ratings. These replacement elements ensure the quality of filtration Parker is known for.

As option the DF2070 filters are available with a secondary safety filter elements inside the primary filter elements, to secure a certain degree of filtration even in a by-pass situations.

Note:

The DF2070 Length 2 filter uses 2 primary elements and 1 secondary element (optionally) per side.

The DF2070 Length 3 filter uses 3 primary elements and 1 secondary element (optionally) per side.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
