### Technical Specifications

Filter Material:	060W Wiremesh	Filter Element Type:	Cleanable metal mesh element
Micron Rating:	60 µm	Length:	303 mm
Product Series:	SF1040	Diameter:	271 mm
Seal Material:	Nitrile	Options:	Standard
Maximum Pressure Differential:	5 bar (ISO 2941)		

 [Safety Warning](#)

### Item Information

The high quality replacement elements for the SF1040 filter series are available with several filter materials and micron ratings.

These genuine Parker replacement elements ensure the high quality of filtration Parker is known for.

SF1040 filter use 2 primary elements, an option is available with a (one) secondary safety filter element inside the 2 primary filter elements, to secure a certain degree of filtration even in a bypass situations.

The SF1040 elements are also used in the SFR1040 and SFH1040 filter models.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
