Tank Mounted Suction Filter - ATZ Series

[Solutions](#)

Part # **ATZ1XXXBPXS24Q**

ATZ Series Suction Filters.
Submersible (under oil level) tank-wall mounted suction line filters containing a valve that closes automatically before changing the element.
Maximum flow 300 l/min.

Technical Specifications

Flow Rate:	0 to 130 l/min	Options:	No connections plugged / No blind flange
Connection Type:	SAE-24 + 2 x SAE-16	Indicator Type:	No indicator, port plugged
Filter Element Type:	No element	Seal Material:	Nitrile
Micron Rating:	No element

Item Information

Items marked with an asterisk * in the drop-down menus are standard choices.

The ATZ Series is a compact and robust cast aluminium tank-wall mounted filter, located below tank oil level. This submersible suction line filter offers maximum protection for the hydraulic system pump. When removing the element, the check valve closes automatically, eliminating any chance of oil leakage. Pre-filtration takes place by means of a magnetic column. Thanks to the 'In-to-Out' filter principle, contaminated oil cannot leak back into the system. Suitable for heavy duty industrial applications and recommended for reservoirs with high contamination ingress. ATZ Filters are capable of handling nominal flow rates up to 300 l/min.
