Services Tanktop Mounted Return Line Filter - BGT Series

Whatt#BB/GT1620QLBPER481

The BGT Series features pre-filtration by means of a magnet column and a full flow bypass with low hysteresis. Providing maximum flow rates of 2400 l/min at maximum pressure 10 bar.

Item Information

BGT tanktop mounted return line filters feature pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Thanks to the 'In-to-Out' filter principle, contaminated oil cannot leak back into the system. BGT Filters are available in versions capable of handling flow rates up to 2400 I/min. They can operate with a maximum working pressure of 10 bar.

LEIF® elements are available for environment-friendly filtration for versions up to 1500 l/min.

Product Features:

- · BGT features pre-filtration by means of a magnet column.
- · Filter heads with multiple ports available.
- Flow from inside to out.
- · Full flow bypass with low hysteresis.
