# **Item Information**

The Parker Filtration ETF Series is an economic tank top mounted return line filter that has been used and proven in many hydraulic filtration applications.

It utilizes a re-inforced co-polymer head equipped with 2 return ports and quick-release cover.

For use in hydraulic systems with nominal flows up to 175 l/min and a maximum pressure of 6 bar.

**Product Features:** 

- A re-inforced co-polymer head equipped with 2 return ports.
- Quick-release cover design.
- Flow from inside to out.
- Maximum pressure 6 bar. Maximum flow 175 l/min.
- An economic return line filter for hydraulic systems.

**Typical Applications:** 

- Lorry mounted cranes
- Agricultural equipment
- Container hook loaders

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
