In-Tank Mounted Filter - IN-AGB Series

[Solutions](#)

Part # **IN1105QBNEXX3**

The IN-AGB Series is a low cost, high performance in-tank mounted return line filter featuring a quick response bypass construction with low hysteresis and a high dirt-holding capacity.

Item Information

The low-cost, high-performance return line IN-AGB filter features Q3 filter media, a bypass construction with low hysteresis, magnetic pre-filtration and a high dirt-holding capacity. The range is capable of handling flow rates from 30 l/min up to 2400 l/min. LEIF® elements are available for flow rates up to 1500 l/min, meeting the most stringent demands for environmentally-friendly filtration and offering protection against poor quality pirate elements.

Features and Benefits

- The filter is integrated into the tank for a compact, low-cost design

• Production with low hysteresis for improved system protection.

• Magnetic pre-filtration removes ferrous particles, even during bypass conditions for improved fluid cleanliness levels and extended element life and a high dirt-holding capacity.

[Home](#)

[Products](#) • Wide range of diffusers including airtight options.

[Support](#) • Flow from inside to out ensuring all captured contamination is retained inside the element and no recontamination of the system during element change out can occur.

[Industries](#) • Patented LEIF® elements safeguard filtration quality
