

In-Tank Mounted Filter - IN-AGB Series

Part #: IN11D10QBNEXX1

The IN-AGB Series is a low cost, high performance in-tank mounted return line filter featuring a quick response bypass construction with low hysteresis and a high dirt-holding capacity.

Technical Specifications

Brand:	Parker	Product Type:	Hydraulic Filter
Flow Rate:	650 l/min	Seal Material:	Nitrile
Division:	Hydraulic & Industrial Process Filtration Division EMEA	Product Series:	IN-AGB Series
Bypass Valve:	1.5 bar	Height:	407 mm
Pressure Rating:		Outside Diameter:	150 mm
Filter Element Type:	10Q Microglass	For Fluid Type:	Hydraulic Oil
Industry:	Industrial Manufacturing Equipment, Off-Road Machinery	Operating Pressure:	0-34 bar, 0-500 psi
Micron Rating:	10 µm	Operating Temperature:	-40 to +100 °C
Application:	Agricultural Machines, Articulated Dump Trucks, Forestry Equipment, Lubrication Systems, Excavators	Mounting Type:	Tank Mounted
Options:	No Diffuser	Specifications Met:	Degree of filtration determined by multipass test according to ISO 16889.
Technology:	Hydraulics, Filtration	Indicator Type:	No Indicator

Item Information

The low-cost, high-performance return line IN-AGB filter features Q3 filter media, a bypass construction with low hysteresis, magnetic pre-filtration and a high dirt-holding capacity. The range is capable of handling flow rates from 30 l/min up to 2400 l/min. LEIF® elements are available for flow rates up to 1500 l/min, meeting the most stringent demands for environmentally-friendly filtration and offering protection against poor quality pirate elements.

Features and Benefits

- The filter is integrated into the tank for a compact, low-cost design
- Bypass construction with low hysteresis for improved system protection.
- Magnetic pre-filtration removes ferrous particles, even during bypass conditions for improved fluid cleanliness levels and extended element life and a high dirt-holding capacity.
- Wide range of diffusers including airtight options.
- Flow from inside to out ensuring all captured contamination is retained inside the element and no recontamination of the system during element change out can occur.
- Patented LEIF® elements safeguard filtration quality
