In-Tank Mounted Filter - IN-AGB Series

WPharet t#BLN 1210QBNEXXX3

The IN-AGB Series is a low cost, high performance in-tank mounted return line filter featuring a guick response bypass construction with low hysteresis and a high dirt-holding capacity.

Technical Specifications

Filter Element: 10Q Microglass * Bypass Valve (bar): 1,5 * Flow Rate: 600 I/min Brand: Parker Bypass Valve 1.5 bar Pressure Rating:

Division: Hydraulic & Industrial Process Filtration Division EMEA

Filter Element Type: 10Q Microglass

Industrial Manufacturing Equipment, Off-Road Industry: Machinery

Micron Rating: 10 µm

Agricultural Machines, Articulated Dump Trucks, Application: Forestry Equipment, Lubrication Systems, Excavators

Options:

Diffuser type T

Technology: Hydraulics, Filtration Product Type: Hydraulic Filter Seal Material: Nitrile Heiaht: 617 mm **Product Series: IN-AGB Series** For Fluid Type: Hydraulic Oil Outside Diameter: 193 mm Operating Pressure: 0-34 bar, 0-500 psi

Operating -40 to +100 °C Temperature:

Mounting Type: Tank Mounted

Degree of filtration determined by multipass test Specifications Met:

according to ISO 16889.

Indicator Type: No Indicator

Item Information

The low-cost, high-performance return line IN-AGB filter features Q3 filter media, a bypass construction with low hysteresis, magnetic pre-filtration and a high dirt-holding capacity. The range is capable of handling flow rates from 30 l/min up to 2400 l/min. LEIF® elements are available for flow rates up to 1500 l/min, meeting the most stringent demands for environmentally-friendly filtration and offering protection against poor quality pirate elements.

Features and Benefits

- The filter is integrated into the tank for a compact, low-cost design
- · Bypass construction with low hysteresis for improved system protection.

tration removes ferrous particles, even during bypass conditions implicated fluid cleanliness levels and extended element life and a ringir direction light options.

Home

• Wide range of diffusers including airtight options.

Products
• Flow from inside to out ensuring all captured contamination is retained inside the element and no recontamination of the system during element schange out can occur.
• Patented LEIF® elements safeguard filtration quality industries
