# **Services Top-**mounted Breathers and Filler Breathers - AB Series

 $\bigcirc$ 

F

Q

## Whatet#BlyFC.622111

The Parker AB Series comprises a broad range of topmounted breathers and filler breathers. The filler breathers protect hydraulic systems from airborne particle ingress, while allowing sufficient airflow into and out of the fluid reservoir.

| ▲ Safety Warning               |   |                           |                                |

### A Safety Warning

## **Item Information**

Ingress of airborne contaminants into hydraulic systems can cause a number of costly issues, including increased wear on pumps and cylinders, decreased performance, shorter maintenance intervals, and added downtime.

The Parker AB Series comprises a full range of top-mounted breathers and filler breathers designed to prevent this by keeping out harmful contaminants and allowing the tank / fluid reservoir to effectively breath during equipment operation. Multiple configurations are available to meet the unique requirements of customers' hydraulic systems, including:

Glass-filled nylon or plated metal steel. Multiple installation available including single hole, three hole, or six hole installation. 2 C C 0 L/min (163 GMP).  $\bigcirc$ 문

**<u>Forre</u>v-on type Breathers** - Glass-filled nylon or plated metal steel. Multiple connection types available. Flow rates up to 620 L/min (163 GPM). Dipsticks available with all options (two lengths and in packs of 10).

Products Lockable Fillers and Filler Breathers (metal) - Pressurized and unpressurized threaded types available. For added reservoir security and oil protection, certain metal filler breathers can be specified with a locking lug option.

AB Series breathers and filler breathers are ideally suited for equipment required to operate in environments laden with dirt and dust. Industries

### Benefits

Services ts contamination and ingress of dirt, sand, dust, metal, etc. into hydraulic circuits, while allowing sufficient airflow into and out of the fluid reservoir

Solutions

· Lengthens time in between required maintenance intervals, reduces operating costs, and extends overall equipment/machine operational life Where to Buy

#### Features:

- · Molded in non-corrodible, glass-filled nylon strong and light
- · Filler breathers available with single hole, six hole, and three hole installation
- Screw-on breather range G1/2 and G3/4 options
- Compact range G1/4, G3/8, R1/2 and R3/4 options
- · Metal filler breathers pressurized and unpressurized threaded type
- Flange mounting type options
- · Lockable options for reservoir security and oil protection

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
