

## Replacement Elements - Maxiflow Series

Part #: MXR9550

The replacement spin-on canisters of the Maxiflow filter series make use of high quality filter media suitable for fatigue load due to high frequent flow fluctuation and resulting in extended element life time.

### Technical Specifications

Maximum Pressure Differential:	10 bar (ISO 2941)	Filter Element:	10Q Microglass
Filter Element Type:	Spin-on element (single)	Filter Housing Series:	MXA2 / MXA3

[Safety Warning](#)

### Item Information

Maxiflow filters are ideally suited to full flow and bypass circuit installations where the need for high quality filter media is recommended. Optional indicators provide direct information as to when the spin-on canisters require replacement.

The Maxiflow spin-on canisters are manufactured with high quality filter media, recommended for effective protection of system components, improving system productivity and profitability.

Using genuine Parker replacement elements guarantees Parker's quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.
