

Top-mounted Breathers and Filler Breathers - AB Series

Part # PAB.1730.10.5

The Parker AB Series comprises a broad range of top-mounted breathers and filler breathers. The filler breathers protect hydraulic systems from airborne particle ingress, while allowing sufficient airflow into and out of the fluid reservoir.

Technical Specifications

Features:	Pack of 10 pcs	Technol	Filtration, Hydraulics
Product Type:	Filler Breather	Installatio	Tank hole mounted
Brand:	Parker	Connection	6 Hole Installation
Housing		Type:	
Material:	Plated Mild Steel	Product Series:	AB Series
Division:	Hydraulic & Industrial Process Filtration Division EMEA	Strainer Type:	95 mm strainer
Pressure Relief		For Fluid Type:	Air
Valve Type:	0.35 Bar	Operating	
Industry:	Agriculture, Construction, Oil and Gas, Marine, Mining, Forestry	Temperature:	-30 / +90
Flow Rate:	430 l/min	Includes:	-
	Deck and Mobile Cranes, Firefighting Equipment, Forwarders, Hydraulic Presses, Marine Steering Units, Power Packs, Waste Management, Dump and Fork Lift Trucks, Excavators, Harvesters, Waste Balers, Reach Stackers, Wheeled Loaders, Drilling Equipment, Industrial Power Units	Outside	
Application:		Diameter:	76 mm
		Mounting Type:	Tanktop
Micron Rating:	10 µm	Seal Material:	Nitrile
		Filter Material:	10µ abs. PU-foam

 [Safety Warning](#)

Item Information

Ingress of airborne contaminants into hydraulic systems can cause a number of costly issues, including increased wear on pumps and cylinders, decreased performance, shorter maintenance intervals, and added downtime.

The Parker AB Series comprises a full range of top-mounted breathers and filler breathers designed to prevent this by keeping out harmful contaminants and allowing the tank / fluid reservoir to effectively breath during equipment operation.

Multiple configurations are available to meet the unique requirements of customers' hydraulic systems, including:

Parker Glass-filled nylon or plated metal steel. Multiple installation available including single hole, three hole, or six hole installation. Flow rates up to 620 L/min (163 GPM).

Home

Screw-on type Breathers - Glass-filled nylon or plated metal steel. Multiple connection types available. Flow rates up to 620 L/min (163 GPM). Dipsticks available with all options (two lengths and in packs of 10).

Products

Lockable Fillers and Filler Breathers (metal) - Pressurized and unpressurized threaded types available. For added reservoir security and oil protection, certain metal filler breathers can be specified with a locking lug option.

Industries

Breathers and filler breathers are ideally suited for equipment required to operate in environments laden with dirt and dust.

Services

Prevents contamination and ingress of dirt, sand, dust, metal, etc. into hydraulic circuits, while allowing sufficient airflow into and out of the fluid

Solutions

When they are replaced, they reduce the time in between required maintenance intervals, reduces operating costs, and extends overall equipment/machine operational life

Features:

- Molded in non-corrodible, glass-filled nylon – strong and light
- Filler breathers available with single hole, six hole, and three hole installation
- Screw-on breather range – G1/2 and G3/4 options
- Compact range – G1/4, G3/8, R1/2 and R3/4 options
- Metal filler breathers – pressurized and unpressurized threaded type
- Flange mounting type options
- Lockable options for reservoir security and oil protection

For more information or a detailed discussion about your specific requirements please contact Parker or an authorised Parker distributor.
