

Absolute Spunbonded Depth Filter Cartridges - SPUNFLOW QA

Part #: QA39P057SS

Available in two grades, polypropylene and polyester / nylon, the range offers extremely wide chemical compatibility.

Technical Specifications

Seal Material:	Silicone	Micron Rating:	0.5 µm
Length:	39.25" (1000 mm)	End Cap Configuration:	Fin / 226
Filter Material:	Polypropylene		

[Safety Warning](#)

Item Information

The Spunflow QA range of absolute rated, graded density filter elements are manufactured from thermally bonded microfibrils layered onto a central core. The construction consists of numerous, distinctive filter zones with coarser outer layers acting as prefilters for the tighter, absolute rated central zone. This removal profile produces an element possessing high voids volume, giving high flow rates, low pressure loss, high dirt holding capacity and long life.

The thermally bonded media also eliminates fibre migration and resists unloading during service. Available in two grades, polypropylene and polyester / nylon, the range offers extremely wide chemical compatibility.

Applications

Solvents / Membrane prefiltration / Industrial coatings / Photographic chemicals

Features

- Absolute rated efficiency 99.98% from 0.5 to 90 micron.
- Unique outer graded density structure.

- Available in a comprehensive range of end cap configurations.
- All polypropylene structure plus optional polyester media with nylon end caps.

Benefits

- Depth filtration with consistent absolute retention.
- Increased dirt holding capacity.
- Simple retrofitting to existing systems and housings.
- Broad range of chemical compatibility.
