Where To Buy

Tanktop Mounted Return Line Filter - TTF Series

Part #: TTF4A10QBP2E2G164

The TTF Series features pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Maximum pressure 10 bar. Maximum flow 500 l/min. A second return port is an available option as is a filling port in the filter cover.

Technical Specifications

Flow Rate: 0 to 175 l/min
Brand: Parker
Bypass Valve Pressure

Rating:

1.5 bar

Nivision: Hydraulic & Industrial Process Filtration Division

Division: Hydraulic & Industrial Process Filtration Division EMEA

Connection Type: 2 x G1

Industry: Trucks and Buses, Materials Handling, Construction

Filter Element Type: 10Q Microglass

Application: Refuse Trucks, Mobile Cranes, Power Packs, Wheel Loaders, Drilling Equipment

Micron Rating: 10 μm

Technology: Filtration, Hydraulics
Indicator Type: No indicator, port plugged L+R

Product Type: Hydraulic Oil Filters
Product Series: TTF Series
Options: Diffuser type P
Product Style: Tanktop Mounted Return Line Filter

Seal Material: Nitrile

Bypass Valve Pressure Rating:

Operating Pressure: 10 bar, 150 psi
Operating -40 to 100 °C
Temperature: 10Q Microglass

Mounting Type: Tanktop Mounted
Indicator Pressure
Setting: No indicator

⚠ Safety Warning

Item Information

Parker TTF tank top mounted return line filters feature pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Thanks to the "In-to-Out" filter principle, contaminated oil cannot leak back into the system during element change.

TTF filters are available in formats capable of handling flow rates up to 500 l/min. They can operate up to a maximum working pressure of 10 bar. Options include a filling port in the filter cover, a second return port and customised diffusers can be specified.

Features and Benefits

- 10 bar rated filter can be utilised for severe return line applications for reduced downtime due to premature filter failures
- Patented LEIF® elements safeguard filtration quality

ation removes ferrous particles, even during bypass conditions for improved cleanliness levels and extended element life time in-to-out filtration means captured contamination is retained inside the element preventing recontamination of the filter

 \bullet Quick response bypass with low hysteresis for improved system protection. $\underline{\textbf{Products}}$
