Tanktop Mounted Return Line Filter - TTF Series

Part #: TTF505QBS1EG163

The TTF Series features pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Maximum pressure 10 bar. Maximum flow 500 l/min. A second return port is an available option as is a filling port in the filter cover.

Technical Specifications

Flow Capacity (I/min): 150 * 1,5 * Bypass Valve (bar): G1 * Port Connection Type:

Filter Element: 05Q Microglass Flow Rate: 0 to 175 l/min Brand: Parker **Bypass Valve Pressure**

1.5 bar Rating:

Hydraulic & Industrial Process Filtration Division Division:

Connection Type: G1

Trucks and Buses, Materials Handling, Construction Industry:

Filter Element Type: 05Q Microglass

Refuse Trucks, Mobile Cranes, Power Packs, Wheel Application:

Loaders, Drilling Equipment

Micron Rating:

5 µm

Technology: Filtration, Hydraulics Electrical 42V, NO/NC, M10x1 Indicator Type: Hydraulic Oil Filters Product Type: Diffuser type T

Options: **Product Series:** TTF Series Nitrile Seal Material:

Tanktop Mounted Return Line Filter Product Style:

1.5 bar

Bypass Valve Pressure

Rating:

Operating Pressure: 10 bar, 150 psi Operating -40 to 100 °C Temperature: Filter Element Type: 05Q Microglass Mounting Type: **Tanktop Mounted**

Indicator Pressure Setting:

1.2 bar

⚠ Safety Warning

Item Information

Parker TTF tank top mounted return line filters feature pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Thanks to the "In-to-Out" filter principle, contaminated oil cannot leak back into the system during element change.

TTF filters are available in formats capable of handling flow rates up to 500 l/min. They can operate up to a maximum working pressure of 10 bar. Options include a filling port in the filter cover, a second return port and customised diffusers can be specified.

Features and Benefits

- 10 bar rated filter can be utilised for severe return line applications for reduced downtime due to premature filter failures
- · Patented LEIF® elements safeguard filtration quality
- · Magnetic pre-filtration removes ferrous particles, even during bypass conditions for improved cleanliness levels and extended element life time
- In-to-out filtration means captured contamination is retained inside the element preventing recontamination of the filter
- Quick response bypass with low hysteresis for improved system protection.
