# **Tanktop Mounted Return Line Filter - TTF Series**

# Part #: TTF720QLBP2ELD243

The TTF Series features pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Maximum pressure 10 bar. Maximum flow 500 l/min. A second return port is an available option as is a filling port in the filter cover.

## **Technical Specifications**

| Flow Rate:                       | 0 to 450 l/min                                     | Indicator Type:                                  | No indicator, port plugged L+R     |
|----------------------------------|--|--|------------------------------------|
| Brand:                           | Parker   | Options:   | Diffuser type T                    |
| Bypass Valve Pressure<br>Rating: | 1.5 bar  | Product Series:                                  | TTF Series                         |
|                                  |  | Seal Material:                                   | Nitrile                            |
| Division:                        | Hydraulic & Industrial Process Filtration Division | Product Style:                                   | Tanktop Mounted Return Line Filter |
|                                  | EMEA   | Bypass Valve Pressure                            | 4.51                               |
| Connection Type:                 | 1½"SAE-3000 + G1½                                  | Rating:  | 1.5 bar                            |
| Industry:                        | Trucks and Buses, Materials Handling, Construction | Operating Pressure:                              | 10 bar, 150 psi                    |
| Filter Element Type:             | 20QL Ecoglass                                      | Operating Temperature:                           | -40 to 100 °C                      |
| Annlingtion                      | Refuse Trucks, Mobile Cranes, Power Packs, Wheel   | 1 5 1  |                                    |
| Application:                     | Loaders, Drilling Equipment                        | Filter Element Type:                             | 20QL Ecoglass                      |
| Micron Rating:                   | 20 µm  | Mounting Type:<br>Indicator Pressure<br>Setting: | Tanktop Mounted                    |
| Technology:                      |  |  | No indicator                       |
| Product Type:                    | Hydraulic Oil Filters                              |  |                                    |
|                                  |  |  |                                    |

▲ Safety Warning

## **Item Information**

Parker TTF tank top mounted return line filters feature pre-filtration by means of a magnet column and a quick response bypass with low hysteresis. Thanks to the "In-to-Out" filter principle, contaminated oil cannot leak back into the system during element change.

TTF filters are available in formats capable of handling flow rates up to 500 l/min. They can operate up to a maximum working pressure of 10 bar. Options include a filling port in the filter cover, a second return port and customised diffusers can be specified.

#### **Features and Benefits**

- 10 bar rated filter can be utilised for severe return line applications for reduced downtime due to premature filter failures
- Patented LEIF® elements safeguard filtration quality
- · Magnetic pre-filtration removes ferrous particles, even during bypass conditions for improved cleanliness levels and extended element life time
- · In-to-out filtration means captured contamination is retained inside the element preventing recontamination of the filter
- Quick response bypass with low hysteresis for improved system protection.
