Item Information

The DFBO filter brings a duplex version of the Racor® FBO filters to an engine room environment for continuous diesel filtration. The new duplex design ensures that fuel is efficiently filtered at all times. The cast iron head and steel bowls mean that it is perfect for use in marine applications.

The DFBO comes in two bowl lengths, allowing diesel flows up to 90 l/min. Depending on the elements inside, the unit can be used as prefilter, water separator/particle filter or as water absorption filter. The DFBO filter is easy to service: no special tools are required.

Applications

- Fuel systems on diesel engines
- Marine fuel docks
- Diesel fuel dispensing system
